

Riazuddin Kawsar

Director, Spacenus GmbH

Riazuddin Kawsar is a specialist in Geo-Spatial technology who has dedicated more than 10 years of work and research on remote sensing capabilities for urban and agricultural development. After earning his Master Degree in Development Studies, he successfully completed his second Master Degree in Geo-Spatial Technologies, under the framework of Erasmus Mundus Joint Master Degree scholarship program. He is actively involved in the Erasmus Mundus Association as well as Bangladesh Society of Geo-informatics. By profession, he is closely tied with the Ag-Tech Industries and adores the idea of feeding 9 Billion people by 2050. Apart from his professional expertise in Artificial Intelligence (AI), his experience in working in international and bi-lateral teams as well as with donor organizations (i.e. UNDP, ADB, etc.) brings great value to the working approach within the Spacenus GmbH team.
